## Frameless Glazing

NEW low profile high performance system

# Introduction

Planet has raised the bar once again in the field of Frameless Glazing. Winner of the Design Council award for the innovative Solar glass joint in 2000 which revolutionised the industry, Planet has now launched its own Micro Framed System which is designed, manufactured and installed by Planet's own team to ensure quality and value at every stage. The new product is as close as is possible to a Frameless System with the components manufactured to the right tolerance to allow a truly minimal frame.
